

Prominent political observers say that political leaders in Germany who are supporting the Briand plan for a United States of Europe are playing a skillful game of seeking Pan-European reconciliation to further Gerrany's post war commerce recovery. The Germans are not in a position yet to develop any policy of independent action. The German arny and navy are still held to a minimum strength by the peace terms of the Allies. Whilo in this position, it will be to Germany's. advantage to meet half way all overtures on the part of the rest of Burope.

## ATHLJEPTCS TAKE SERIES

Coming thru with one of thoir famous lato inning rallies, the Philadolphia Athlotics scorod the threc runs necded to bost. tho Cubs 3-2 in the ninth imming of Monday's Serios finale. It was Connic Mäck's first Forld's titlo in sixtoen yoars.

Tho dynamic Philadolphia tean again. proved that, it has the most irresistiblo attack in prosont day bascbajl. The final game was in keoping with the provious ones of tho present sorics, al tho not quite so startling as the ton-rum rally on Saturday. Yot wo aro inclinod to bolievo that thoy would havo battled until sundown if the Cubs loed had beon supficiently groat.

It was tho third consocutife year that the gonfolou has gone to tho A. L. ontry. and in thoso threo years, tho gam mon by Cubs on Friday in Piiladolphia was the only game of thirtoon that a N. L. team has won. Tho N. Y. Yonks took both Pittsburg and St. Louis for four consocutive gamos to closo the two provious soasons.

Tho "h's" had ovcrything necossary for a wiming toam; Excollent pitching; probably the bost all-round catcher in cither circuit; " ${ }^{\text {a }}$ hard-hitting, fastfielding outfield trio ih Simmons, Hans and Millor; a woll-belencod infiold that boasted the slugsing Jisuc Foxs at first baso; youth, stanina and a minning spirit and what may havo beon most important of all--tho brains of Cornolias McGillicuday at the helm.

Nocossity, it has boon said, is tho Nother of Invontion. That was back in a world whore all things arc oqual-that is, where there is an oqual number of women and men. In Aruba its slightly different, and we'll change the axiom to read "Nocessity needs must invont some Mammas."

A mumber of the Boys in B.Q. \#2 liast. week developed a wild desire to danco. They were tired of this great shortage of the Opposite Sex, so they decided they'd have a dance regardless.

Down to the big recoption room of the B. Q. they mont, armed with plonty of cannod music. It was an evoning dross affair, as all the guests woro pajamas.

Fhien the first waltz burst forth, DOC Ceee led "Miss" Engle onto the floor, closoly followed by Bill Bonnett, who had "Miss" R. O. Smith loaning heavily on his arm. This attractive couple wis followed by Bob Turner of Kollogg stopping out with "Miss" Pruett, who glided gracefully about the largo room to the lilting rhythms.

As the Pan-Atrope Orchestra was woll wound up that night, the dancers passed a morry time. Just at the stroke of trelve, refroshmonts, both solid and liquid, were sorved in on ante-chamber, where the guests wore further entortainod with weird music furnished by that.inimitable pair-Beattiski and Jancosovitch.

The boys are now plaking a minsquerade ball for the near futurc. Even if tho ladies don't caro to attend, porhaps they'll not objeot to lending their bost satin gowns and slippers for this momontuous ocoasion.

## NON SHOP FLIGHT by <br> The Parrot

Tho other day, while picking at some graiñ of rice back of the mess hall, I cemo upon a nowspapor and road that Colonel Lindbergh was making a flight about South imerica.

Innediately my pride as a flyer was arousod and I.decided to roske also a rocord flight, around....Aruba. I have had my pilot's license sinco a very fer days aftor I come out of the ogg whore I wae hatched, ny groon and rod wings aro almays in. porfoct condition and of course, as I novor carry a gasoline supply, radio apparatus or a parachute, I on nevor long gotting ready.

I took off. almost vertically, which is quite a featuro as $I$ an not oquippod. with on holicoptor. I circled noatly : around to tost ry ongino, I scroanod shrilly onec or twice to test ryy lungs and I was off at ry usual cruising spood.

Then I an in the air, es I an at the sarie tino ongine, pilot and navigator, I havon't vory much tine to loaf.
I. pessod over bird's houso row whoro tho houses appeared to no just as flat as if they had boon drawn on the ground. I bankod ovor tho tomis courts to soo pyemies aimessly-it soonodOOrunning and waving thoir arms about after an invisible object.

Then I cemo over the lagoon, I could plainly soe its botton of soft sand and coral through the clear blue water. I made a tail spin out of puro joy of liv-ing---But I had forgotten that the lagoon is the property of the pelicans and that thoy aro very jealous... Suddenly I spottod two big shadows rofloctod on the caln surface. I know that I was in for it... The two birds wore closing on mo. Ono was above ry tail-a strategic position:
"Thy did I not borrow a machino gun fron the Vonezuolian revolutionarios?"
I criod oloud in anguish...
"Could I"face the sharp beaks that mould toar ne up in no time?... Tho minute was oxcruciatingt. $\therefore$ As the birds closod I pulled dosporately on tho controls and made the neatost Irmolman one could ovor soo.

Policens are not very clovor and thoir flying nothods allows neithor spoed nor
curaing. In tho next war they will., bo. usod as borabcrs as thoy can carry hopavy loads in thoir bill. Those two did not pursuo ne as I bankod to gain altitude. I was savod:... I turnod ry nose to the lighthouse ond flew at top spood.

As I pessod that impressive nonument I raicribered wany storios my mether had 'tole se of how for' years and yoors this lighthouse had.boon the only building of importanco in our part of tho country. What an insignificont dot it nade now about the scenery since tronty nine tall, black monuments havo beon erectod along the shore of San Nicholas. Those narvelous taenty nine tall, black nonumon'ts thet spit at tines a thick black sroke that smolls vory bac, but is so pretty against the sunset. To what extent of skill men-tho crawling ants I seo bolow-mean go!

Aftor the light housc I followod the shore passing over it quickly as it offerod very little varicty in tho landscape and very lịttle interost excopt for colors. Scen fron tho air colors are intensificd; sand is a creary white, the arroyos lined by cactus appear on intensc Green and the coral rocf is a soft pearl eray hud that ono could hever roal$i_{z}$, sceing it from a land anglo.

A long and narrow dash of green-which I had previvusly recorded on ry chart told me that I mas above the banana grove. The thequght of a nice cool lunch mado zy tonguc water in my beak, but I resisted the impulse. I would not land. I would accormlish ny mission. I would fly right around Aruba without a st op unless I was rurced down by adverse circumistancos. I had found ry adventurous soul! I the a pionoer of the air, ny heroic foature would save domocracy and assure tho merld peaco... bosido it would affirm the superiority of ry onsine - over all tho man mado ensinos of tho world. I Foule sec the finish of ny encurance test or crash---

The waves cashed over tho beach at La Fontaine. Thcy cäne fron far off at sca. At first thoy wero a long, srooth liquid swell, then they broke into sraller ones, each crowned with white, opalescont foam in the'sproys of which playod tho sum rays. Thcy dashed with a roar against the xocks one following the other ind. cessantly like an arry of white and eroon soldicrs condermod by fate to repoat an assault for the whole lencth of otornity.

Soon I saw the North lighthouse. I had never viened that very renarkace structure. It appeared very white and straight. My pride felt rather smaller but I soon recained faith in ry country as I remeribered the Twenty nine beautiful black recent towers built along our bay.

Our Staff Artist has pictured a new style for ladies. Apparently they are all going to be high brows this season. Below we are listing a few poignant pointers as to what the Well Dressed wan will wear in Aruba.

White trousers will be shorter-after the first laundering.

Buttons are caming into vogue again, and will be. used instead of safety pins and tooth-picks. There is a new supply on hand at the Commissary.

Fashion decrees that Derbies must go. In Arube, att least, its to "Hel-met" them.
sloeve-less shirts will continue to be popular, especially among the Shift Workers. Most of these boys are from the wide-open places out West, and mast have elbow room.

Collars will be worn by dogs, and "hounds" for style. However, the open-shirt will probably find more favor, particulerly among those whose Adam's Apple is under control.

Belts will be worn tighter th is season, by those who have developed "corporations." Hair will be out "Fuller" than ever.
